NOT TO SCALE

1) Support HSSD sample firing using clamps attached to the roof system beams and in accordance with the manufacturer's requirements. Spinal drain detector heads shall not exceed 10 ft. or center.

2) HSSD sample firing shall be provided for the enclosure and for each level within the space in a separate system from that protecting the enclosure.

3) Each HSSD detector shall be mounted with the top of the detector at 5-7 ft. as the main level.

4) Operation of a Level 1 or Level 2 Alarm for other detector shall be acknowledged at the display located at the main level. Operation of a Level 1 alarm for the HSSD system protecting the enclosure shall result in the operation of a yellow strobe and sound horn. Operation of a Level 3 alarm for the HSSD system protecting the enclosure shall cause the fire sprinkler system to be disabled. Operation of a Level 3 alarm for any other detector shall result in operation of the building's fire alarm system.
