GENERAL NOTES:

1) The systems design, fabrication, procurement, and installation of the fire protection system(s) and equipment, as shown in the contract documents, shall be performed in accordance with the provisions of the AHJ(s) and the applicable building codes.

2) Installation of new conveyance systems is required for the fire alarm system to be complete.

3) All modifications to existing systems are necessary for the operation of the fire protection system(s) and equipment. All modifications shall meet the requirements of the applicable building codes and standards. The location and extent of the modifications shall be determined by the AHJ(s).

4) System modifications are necessary for the operation of the fire alarm system as required.

5) Systems and device testing.

6) The contractor shall be responsible for testing and demonstrating all systems and equipment compliance with the applicable building codes and standards.

7) The contractor shall be responsible for testing and demonstrating the systems and equipment compliance with the applicable building codes and standards. The systems and equipment shall be tested and demonstrated in accordance with the requirements of the applicable building codes and standards.

8) All equipment shall be new and approved as required by the applicable building codes and standards.

9) Systems, equipment, installation, and materials used shall comply with the following:
   a) The requirements of the applicable building code(s) and standards.
   b) The requirements of the applicable building code(s) and standards.
   c) The requirements of the applicable building code(s) and standards.
   d) The requirements of the applicable building code(s) and standards.

10) The sequence of operations is as follows:

   a) Site modification
   b) Equipment installation
   c) System testing
   d) Final inspection
   e) Commissioning

   NOTE: The sequence of operations above primarily addresses actions as a facility of the project that are not all building fire alarm functions.

LEGEND:

- EXISTING FIRE ALARM CONTROL PANEL
- WATERFLOW阀
- VALVE POSITION TRANSMITTER
- NEW RELAY
- RACETY JUNCTION BOX
- EXISTING FIRE ALARM CONTROL
- NEW FIRE ALARM CONTROL
- Duct = 2 PAR and conductors
- Duct = 2 PAR and conductors
