Data / Download Data

Download Data

Level 2 data is available from this page. For other data products, please visit the FluxNet data archive.

- Select sites below, enter your intended use and click Download All Files.
  Note: Your download will be faster if you only choose the sites you need.

- When files are downloaded, your contact information, intended use and list of data files will be automatically shared with the tower PI by email.

- For each site selected, data for all years for that site will be downloaded. This is for overall efficiency.

- To see which sites have data for which years, see Data Availability.
