

#### FluxNet Navigation

##### Notes

1. Existing FluxNet top navigation
2. Proposed new FluxNet top navigation for WordPress: Menu items are all title case
3. Shorten to "About"
4. News: Consider eliminating or moving these items. Provide news items as "FLUXNET ANNOUNCEMENTS" on Home page, which is populated by blog posts.
5. Move items into Community menu as follows:
  - Publications → Publications
  - Photo Gallery → Photo Gallery
  - Job Postings → Opportunities
  - Newsletters → Blog
  - Announcements → Blog
  - Meetings & Workshops → Events
  - FluxNet Mailing List → Join
  - Participants → Participants
6. Delete Useful Links menu item: Replace with Useful Links item in right sidebar that will appear on all standard pages on the website. Page that are not standard have content and/or features that do not leave room for the right sidebar.
7. Help: Consider integrating content into other content-specific pages, and eliminate the Help menu. Help is shown in the new version, because this is a content decision.
8. Contact: Move into About menu.
