BERKELEY LAB

# really quickly

The world is changing.

Collaboration Tools  
Strategy - Not a service  
announcement.

Content \* Realtime&Video \* Mobile

A Stack of tools to  
improve collaboration.

Information sharing &  
Concierge Services

BERKELEY LAB

## considerations...

1. Platform Neutral
2. Trivial support for external collaborators
3. Integrates with IDM strategy (Shib/CAS/OpenID)
4. Security built in - easy to do the right thing.
5. Not one size fits all
6. Not necessarily provided by IT

# today...

## Content Tools

Google Docs

Google Sites

Commons

eRoom

Celoxis

## Realtime & Video

Readytalk

TokBox

Video Futures

## Mobile Devices

m.lbl.gov

app contest

labtech.lbl.gov

and calendar if we have time.

**BERKELEY LAB**

Transform your  
thinking about  
attachments.

Why not just share?

BERKELEY LAB

# gdocs.lbl.gov

- Documents, Spreadsheets, and Presentations.
- All LBL People have accounts.
- Share and collaborate with anyone with a google account.
- Publish openly, or restrict to individuals.
- Work together in realtime.

BERKELEY LAB

# gsites.lbl.gov

- Small collaborative websites.
- Restrict editing and viewing, or publish openly.
- Integrate content, share files, wiki-like functionality.
- Fast simple sharing.

# commons.lbl.gov

- Powerful collab tool based on wiki-thinking.
- Will be “federated” early FY10
- Has replaced existing wiki, should replace eRoom for many at LBL.
- This tool gets better the more you use it. Many “hidden” features.
- Learn by doing!

BERKELEY LAB

# eRoom

- It's time.
- Goal: 1 Year Transition Period
- Step 1 begins now: Play with the other tools and figure out what works for you.
- Highly document-centric collaborations are the most challenging.
- More soon.

# Project Management

- IT is deploying Daptiv (moderate weight)
- We have a pilot of Celoxis (light weight)
- We are negotiating with Manymoon (a different kind of weight altogether).

Do you know other tools?

BERKELEY LAB

These are document  
management and  
workflow tools.

So are many of the business applications.

BERKELEY LAB

# Realtime & Video

# Readytalk

- Audio via telephone, screen/slides via screen.
- .03c per minute per participant, no charge for online.
- No video yet.
- Can record meetings for later replay (best if you are already using the tool)

# TokBox

This is a great tool...

... that we have absolutely  
nothing to do with.

BERKELEY LAB

# Capture

Vision: It's so easy to capture a meeting or seminar that there's no reason not to.

Vision: Instruction and screen demos are easy to capture and share.

BERKELEY LAB

# Seminar & Meeting Capture

- Q2FY10 Target for a suite of new tools.
- Camtasia Relay: Free to all Lab employees, small program on your desktop captures screen & audio.
- Capture Station: Loaner device captures audio, screen, projector, etc.
- Loaner cameras available now.

BERKELEY LAB

# Live Streaming

- Clarified service levels coming within the month.
  - Professional
  - Fixed Camera
  - DIY & Loaners

# mobile

- Mobile Device Integrated Strategy (Direction, Support Model, etc)
- [m.lbl.gov](http://m.lbl.gov) Pilot/Demo
- Apps Contest ends (nov 1/dec 1) (\$2500!)

# calendar

- Migration out of Oracle Calendar
- Doodle.

Help.

maven the tools.

plan to get off eRoom
