

WSEC Luncheon and Networking Session:

Featuring Guest Speaker:
Merna Hurd
Associate Deputy Director
Lawrence Livermore National Laboratory
Building 15-253
Monday, May 13, 2013
11:30am – 1:00pm*

* Lunch will be provided
RSVP required

The **Women Scientists and Engineers Council (WSEC)** is honored to announce **Merna Hurd** as our featured speaker at the next WSEC Luncheon and Networking meeting. Merna will discuss her career in the public and private sectors and how she has overcome obstacles to thrive in a male dominated field. She will also touch on how her career has evolved over the years, and how she manages work/life balance.

Merna earned her Master's Degree in Engineering from the University of Nebraska. She was an Advisor to the Secretary of Energy, and has spent the past several years at Lawrence Livermore National Laboratory. She considers herself fortunate to work at a National Laboratory, where she is stimulated by the pursuit of science and technology through the largest laser system in the world, moving from petaflops to exascale in high performance computing, space situational awareness, and cyber security research. She is concerned with our educational system, particularly in S&T capabilities, and our global challenges in energy, economics, climate and human relationships.

Please RSVP to the Diversity and Inclusion Office (DIO) dio@lbl.gov

Sponsored by the Women Scientists & Engineers Council (WSEC)
