Mail Lists

Email Lists

Berkeley Lab provides a solution for self-managed mail lists using Google Groups.

Groups can be created using: https://identity.lbl.gov/creategroups and managed thereafter at https://groups.google.com/a/lbl.gov/

More information about how to manage lbl.gov Google groups can be found at: Google Groups

Dynamic mailing lists

Some lists must be dynamically-created (for example: level1-lbl or for all members of a division) based on Orgcode or HRIS data. These change often and manual updates are not appropriate. Where possible, the IT Division can programmatically create and update these organization based lists for you using Sympa (lists.lbl.gov). Request help from the IT Help Desk (help@lbl.gov).
