POLICY

A. Purpose

This policy provides general guidelines for Lawrence Berkeley National Laboratory (Berkeley Lab) for determining allowable costs, in compliance with U.S. Department of Energy (DOE) Contract No. DE-AC02-05CH11231 (Contract 31), the Federal Acquisition Regulation (FAR), and the Department of Energy Acquisition Regulation (DEAR). This policy is not intended to amend or replace any federal, state, or regulatory requirements. For more specific details, refer to Contract 31, FAR, and DEAR.

D. Policy Statement

D.1 General

Allowable costs are costs and expenses actually incurred in the performance of work in accordance with the terms of Contract 31, including work funded by DOE, by other sponsors under Strategic Partnership Projects, or any other authorized work under Contract 31 agreements, that are considered necessary or incident thereto, and are determined to be allowable as defined in FAR subpart 31.201-2, Determining Allowability (FAR 31.201-2), as supplemented by specific clauses in Contract 31, and DEAR subpart 970.31, Contract Cost Principles and Procedures.

Individuals with authority to incur specific Berkeley Lab costs are responsible to ensure the costs are allowable under Contract 31 and Berkeley Lab policies, and that supporting documentation is adequate.

Principal investigators and project managers and others with signature authority have a responsibility to ensure, in consultation with the division's or area's Office of the Chief Financial Officer (OCFO) resource management staff, that costs charged to their projects are allowable.

Division and area leaders and managers have a responsibility to provide reasonable assurance that the costs incurred in their division/area comply with the allowability considerations contained in this policy.

A cost is allowable only when it complies with all of the following requirements:

- Reasonableness.
- Allocability.
- Applicable Cost Accounting Standards (CAS); otherwise, generally accepted accounting principles (GAAP) and practices appropriate to the circumstances.
- The terms and conditions of Contract 31.
- Any rules or limitations described in FAR subpart 31.201-2 as supplemented by DEAR subpart 970.31 and/or specific clauses in Contract 31.

D.2 Reasonableness

A cost is considered reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent person while conducting normal Berkeley Lab business. The determination of reasonableness depends upon a variety of considerations and circumstances, including the following:

1. The type of cost is generally recognized as ordinary and necessary to conduct Laboratory business or contract performance.
2. The cost is in compliance with generally accepted sound business practices, arm's-length bargaining, and federal and state laws and regulations.
3. The cost supports the Laboratory's responsibilities to the government, other sponsors, the University of California (UC), employees, and the public at large.
4. The cost does not significantly deviate from established practices.

D.3 Allocability

A cost is allocable if it is assigned or charged to one or more cost objectives (projects) on the basis of benefits received (or other equitable relationship) and charged or allocated consistently in compliance with applicable CAS and the Laboratory's CAS Disclosure Statement. Therefore, a cost is allocable if it:

1. Is incurred specifically for the project.
2. Benefits both the project and other work, and can be distributed in reasonable proportion to the benefits received.
3. Is necessary to the overall operation of Laboratory business.

D.4 Allowability Determinations and Supporting Documentation

1. Determining Allowability
   a. If it is unclear whether a cost is allowable, the individual should coordinate with the Financial Policy and Assurance Office, which
will provide determinations based upon the appropriate directive or regulation, and/or in consultation with the appropriate authority.

b. When costs are identified as questionable but considered necessary, one option available to the Laboratory is to request the Office of the Chief Financial Officer (OCFO) to coordinate with the UC Office of National Laboratories (UCNL) to seek DOE Contracting Officer approval of the specific item or category of costs. Such requests should be made in advance of any commitments being made to utilize Contract 31 funds. Supporting Documentation

2. Supporting Documentation: Each division and area is responsible for accounting for costs appropriately and for maintaining records, including supporting documentation, to demonstrate that costs claimed have been incurred per Contract 31 requirements. DOE may disallow all or part of a claimed cost that is inadequately supported.

D.5 Examples of Unallowable Costs (per FAR 31.205 and DEAR 970.3102-05)

The following are examples of unallowable costs that often arise at Berkeley Lab. The list below does not include all potential unallowable costs.
