

Mitigation Monitoring & Reporting

The Facilities Planning Department oversees monitoring and reporting of mitigation measures identified in CEQA documents (as per CEQA Section 15097) and NEPA documents (as per NEPA Regulations 40 CFR 1505.2(c), et. seq.). These are documented in Mitigation Monitoring and Reporting Programs (MMRPs).

Mitigation measures identified in the [2006 LRDP EIR](#) are considered sitewide measures and are incorporated into all activities and projects at the LBNL main hill site, as applicable, as "Standard Project Features." Those measures are available in the [2006 LRDP EIR MMRP](#).

Project-specific MMRPs are also assigned to certain individual projects at LBNL. Those are incorporated into the following LBNL MMRP Master Table [\[link under construction\]](#). For more information, please contact the Lab's [Environmental Planner](#).
